

SCIJOURN-K PROJECT: JOURNALISM AND RESEARCH STORYTELLING WITH A KENYAN FOCUS

CALL FOR APPLICATIONS: SCIENCE COMMUNICATION PILOT PROGRAM

Are you a journalist or early-career researcher passionate about science communication? We invite you to apply for an exciting new pilot program designed to strengthen science reporting in Kenya.

This initiative offers a unique platform for journalists and researchers to collaborate in crafting compelling, evidence-based feature articles for publication in mainstream and digital media. Selected participants will receive mentorship and editorial support to co-create impactful stories that translate complex scientific research into accessible, engaging content for the public.

The program will culminate in a one-day workshop, bringing together journalists, researchers, and editors to foster dialogue, share experiences, and amplify science communication efforts in Kenya.
